

Winwick Wind Farm

Information sheet

Stag's Holt Wind Farm, Cambridgeshire – for illustrative purposes only.

The proposal

We're currently developing plans for a wind farm in Northamptonshire, which will be situated on agricultural land between the villages of Winwick and Cold Ashby. The proposed wind farm would consist of up to eight turbines, each measuring a maximum of 126.5m high, from the ground to the blade tip. The wind farm would have a generation capacity of between 16MW and 20MW. A map of the site location is shown overleaf.

Current status

We submitted a scoping request to Daventry District Council in May 2009. The scoping document sets out the technical and environmental investigations, which will be undertaken as part of the Environmental Impact Assessment (EIA). The Council has accepted the request. Our next step is to register a planning application for an anemometry mast to measure wind. We'll also be selecting sites to install noise monitoring equipment.

Environmental consideration

Independent experts are currently at the early stages of investigating the local environment. From this work a document called the Environmental Statement will be produced. It will provide information on issues such as how the wind farm may look, heritage, ecology, noise, construction and traffic.

Tell us your views

We aim to provide you with information to understand the benefits and possible impacts of the proposed wind farm in a variety of accessible formats. The web page and email address will help us share this information, receive your feedback, address any concerns and contribute ideas into the project design. For updates on Winwick Wind Farm, please visit eon-uk.com/winwick or email winwick@eon-uk.com

Please turn over.

Your feedback

Please take a moment to tell us what you think of our plans for the Winwick Wind Farm or ask us any questions.

For a response from our team, please fill in your details below.
